Be prepared for mountain bikes and hikers on the trails a lot of the trails are multi use One bad spot on the river tail on the opposite side of the river from the campground. There is a rock face that you have to get around. Some work was done to create a new trail to the side otherwise you have to muddy creek to cross and lots of horse want to

*jump it due to the steep back on the creek. Otherwise the trails are all in great shape.
Bridges on the Wild horse trail where being repaired in 2007.*
